

BOVINE SPONGIFORM ENCEPHALOPATHY (BSE) RISK ASSESSMENT CERTIFICATE FOR FUGENE[®]6

This document certifies that based on the known and cited information below,
FuGene[®]6 transfection reagent is BSE free.

FuGene[®]6 is a multi-component transfection reagent and contains bovine tissue rendered materials inspected by the Food Safety Inspection Services of the USDA and sourced in the State of Wisconsin, USA.

According to the current CDC online database, to date, no cases of BSE have been identified in the State of Wisconsin or surrounding States. (1)

Additionally, the bovine tissue(s) used to manufacture FuGene[®]6 only include bovine tissues found to be absent of detectable infectivity. (2)
